DETAILED ACTION

Election/Restrictions

1. Claims 16 & 33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected group, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement.

Applicant's election with traverse of Group I is acknowledged. The traversal is on the ground(s) that there is no undue burden. This is not found persuasive because Group II is drawn to a kit containing products which may be used in other methods such as hybridization assays.

The requirement is still deemed proper and is therefore made FINAL.

SUMMARY

2. Claims 1-15 & 17-32 are allowable. There is no prior art that teach or suggest binding of nucleic acids to magnetizable cellulose or its derivatives by adjusting a salt and polyalkylene glycol concentrations. The closest prior art is Reeve et al (WO91/12079 22 August 1991) who teach magnetizable beads but do not teach magnetizable cellulose or its derivatives. Cancellation of claims 16 & 33 would render the application allowable. An attempt to call Mr. Snyder on January 11, 2004 but was not successful.
